

DEACTIVATED FIREARMS

All supplied with RCMP Letter of Approval. All deactivated firearms are sold "As Is" and we do not accept returns. Please contact us before purchasing to discuss how the deactivation has been accomplished and we will be pleased to send detailed photos showing any discoloration due to welding etc.

Generally speaking the following is what you will receive: With belt fed guns the top cover will open, where box magazines are used they can be removed, but they will be riveted to limit capacity to five rds or we cut off a feed lip so there is no unsightly rivet but then their capacity is zero. Actions will normally be movable but with full autos the sear is cut or removed so actions will not hold to the rear i.e. No "cock and click". On some SMG and LMG we may be able to allow the stocks to be removed but the guns can no longer be field stripped. Barrels will be pinned and welded into receiver, bolt heads ground away at 45 degrees.

We can deactivate customers guns to order please contact us for estimate.

Currently Available	Price
MG34 All original	\$3,500.00
MG34 Late or post war bipod	\$2,950.00
